PROFILE

Passionate and versatile junior software developer with a strong foundation in full-stack web development, paired with a professional background in administration and customer service. Experienced in building impactful web applications such as Nova Payment Voucher Management System and Afaazi Events. As the Admissions and Student Success Lead at Kanzu Code Foundation, I support learners through their coding journey by guiding them through onboarding, tracking progress, and ensuring a positive learning experience. Committed to continuous learning and leveraging technology to solve real-world problems.
